- F Charging Port
- G Nut (1/4")

Button Control Instructions

- ⊙ Button:
1. Short/Long press button
 2. Double click to change color temperature
 3. Long press to enter into deep sleep state
- ◀ Brightness+ ▶ Brightness-
1. Short/Long press the button to turn on the light when it's powered off (Note: Light memories the last mode before it shuts down).
 2. When the light is on, double click the same button to change the color temperature between 3000K and 5700K.
 3. Long press the button to turn off the light when it's on (The light goes to deep sleep state, the remote control could not work under this state) short press to go to standby state (the remote control still can work under this state)
 4. Each time you press the up button, the brightness increases; and press the down button, the brightness decreases. There are 6 brightness levels in total.
 5. Suitable for photography use and work as emergency lighting.
 6. The indicator light will flash while charging. The indicator flashes once in a period, indicating that the electricity is less than 25%; flashes twice, the electricity is between 25%-50%; 3 times, the electricity is between 50%-75%; 4 times, the electricity is more than 75%. And the indicator light remains on when it has been fully charged.
 7. The light can be operated by the switch button or the remote control. The indicator light will show you the electricity and it will be off after 5 seconds. The indicator flashes 4 time in a period, indicating that the electricity is more than 75%; flashes 3 times, the electricity is between 50%-75%; 2 times, the electricity is between 25%-50%; 1 time, the electricity is less than 5% and the light need charging immediately.

8. Please long press the switch button to leave the light in deep sleep state to protect the battery if it will not be used for a long period of time.
9. Please do not use the light while charging so as to extend its life.
10. It is suggested to fully charge the light if it will not be used for a long time and recharge it at least once every 3 months.

Instructions for using remote control

1. The remote control can operate at any time (except in deep sleep).
2. Super bright mode means the light is the brightest under current color temperature.
3. The effective remote control distance can reach up to 7 meters. Target the remote control at the light-emitting surface.
4. The remote control is packaged in an insulating sheet.

Specifications
